

EXPERIMENT NO-14

AIM: To create an html page with 2 combo boxes populated with month & year, to display the calendar for the selected month & year from combo box using JavaScript.

BRIEF DISCRIPTION: A drop-down menu is a menu that offers a list of options. The title of the menu, or the currently selected item in the list, is always displayed. When the visible item is clicked, other items from the list "drop down" into view, and the user can choose from those options.

The HTML `<input>` element is used to create interactive controls for web-based forms in order to accept data from the user; a wide variety of types of input data and control widgets are available, depending on the device and user agent. The `<input>` element is one of the most powerful and complex in all of HTML due to the sheer number of combinations of input types and attributes.

SOURCE CODE:

```
<!DOCTYPE html>
<html>
<body>
<p>Click the button to display the date after changing the month and
day.</p>
<button onclick="myFunction()">Try it</button>
<p id="demo"></p>
```

```
<script> function
myFunction() {
  var d = new Date();
```

```
d.setMonth(4, 20);  
document.getElementById("demo").innerHTML = d;  
}  
</script>  
</body>  
</html>
```

OUTPUT:
